

Recognize And Classify Animal -- No Animal

Subjects must raise their hand if they see an animal:

- 60 images
- 1 image per second

→ Measure their reaction time.

Brain Pathways

Challenges

Vision involves dealing with:

- Noisy images
- Many-to-one mapping
- Aperture problem

→ Useful information can be extracted by:

- Designing appropriate models.
- Training our algorithms effectively.

Opportunities

Cameras are becoming ever more prevalent and Deep networks have immensely boosted the performance of Computer Vision algorithms:

- Tremendous potential for applications.
 - A window on the way the mind works.
 - But limited understanding of why things work.
- ➔ Still much work to be done !!!!
- ➔ Lots of jobs in Switzerland and elsewhere.
